

PUBLIC NOTICE

TOWN OF DANVILLE

Mosquito Control

The Mosquito Control program begins the week of April 12, 2010 in the Town of Danville. Crews will be checking swamps, marshes, woodland pools, ditches, storm drains and other shallow, stagnant water for mosquito larvae. When mosquitoes are found, the following insecticides may be used: VectoBac (*Bacillus thuringiensis israelensis*), Altosid (methoprene), Agnique MMF (poly-isooctadecyl-hydroxyl), Mosquito Larvicide GB-1111 (aliphatic petroleum hydrocarbons) and BVA 2 Mosquito Larvicide Oil (highly refined petroleum distillate).

If Eastern Equine Encephalitis or West Nile Virus is found in or near Danville, then emergency adulticiding using Anvil (sumithrin), Zenivex (etofenprox), Permanone (permethrin), Flit (permethrin), Bifen I/T (bifenthrin), Wisdom TC Flowable (bifenthrin), Cross Check Plus (bifenthrin), Mavrik Perimeter (tau-fluvalinate), or Suspend SC (deltamethrin) may be done at the following locations: Elementary School, Colby Pond Field, Goldthwaite Field, Day Field, and Church Field. It is not possible to predict if emergency spraying will be necessary. The spray schedule is based upon mosquito surveillance data, disease test results and weather conditions. Further communication will be given if emergency spraying is going to take place.

Residents who do not want their property treated must contact Dragon Mosquito Control in writing at **P.O. Box 46, Stratham, NH 03885**. Be sure to include your name, physical address, phone number, and a description of your property with boundaries. Residents who would like to have their stagnant water checked for mosquitoes can call **964-8400** or email **Info@DragonMosquito.com**. There is no charge for this service. Contact us for more information on spray dates, location, materials used, precautions or other concerns.
